CONFIDENTIAL LABORATORY REPORT

PATIENT NAME	: MRS. RAJU MERCY	BILL NO	: EH156677
AGE	: 61 YEARS	LAB REF NO	: 23KH 0041279
GENDER	: FEMALE	OPD / IP	: IP
REFERRED BY	: DR. DHAMMIKA RASUAYAKE	MRD	: KH/000204081
COLLECTED TIME	: 2023-09-08 09:29	REPORTED TIME	: 2023-09-25 16:44

TEST : HISTOPATHOLOGY

Microscopy :- A). Intra-operative frozen sectioning of tru-cut biopsy of left lung upper lobe mass:-

- Non small cell carcinoma favouring adenocarcinoma. Paraffin embedded sections confirmed adenocarcinoma with necrosis.

B) Histological type of the tumour - Adenocarcinoma, solid and acinar types.

Note:- Lepidic predominant adenocarcinoma is present in central part of the lower lobe.

Grade of the tumour - Moderately differentiated-G2.

Maximum size of the tumour - 5.6 cm (T3)

Bronchial resection margins - Not involved (with 20 mm clearance)

Vascular margin - Not involved.

Lympho-vascular invasion - Not present.

Peri-neural invasion - Not present.

Necrosis - Extensive > 50 %

Air space spread - Not present

Satellite nodules - Not identified.

Uninvolved lung parenchyma - Mild bronchiectasis and obstructive pneumonitis.

Pleural (visceral) invasion - Not Present, but very close with < 1 mm clearance (PL0).

Stromal host reaction - Moderate lymphocytic infiltrate.

Regional lymph nodes, peribronchial (both) - No identified -11
No involved -0/11

Pathological staging - pT3N2 Mx.
PL0
