CONFIDENTIAL LABORATORY REPORT

PATIENT NAME	: MRS. P. W. B. RENUKA VITHANA	BILL NO	: EH_MC_252033
AGE	: 58 YEARS	LAB REF NO	: 24KH 0051287
GENDER	: FEMALE	OPD / IP	: IP
REFERRED BY	: PROF. BAWANTHA GAMAGE	MRD	:
COLLECTED TIME	: 17-09-2024 08:49	REPORTED TIME	: 02-10-2024 10:00

TEST : **HISTOPATHOLOGY**

Conclusion : **Bilateral ovaries and tubes**

Larger cyst : Serous cystadenoma with foci of calcification
Smaller cyst : An organising abscess
Fallopian tubes : Suppurative salpingitis
(Intervening fibrofatty tissue : Deposits of adenocarcinoma)

C) Sections show simple endometrial hyperplasia without atypia . Myometrium shows Multiple intramural leiomyomata with no evidence of nuclear atypia, increased mitosis or coagulative necrosis.

Conclusion : **Subtotal hysterectomy**

Simple endometrial hyperplasia without atypia

Multiple intramural leiomyomata

Suggest : ER, PR and CK 20 immunostains on block A3 to exclude the rare possibility of the primary in the female genital tract

SK - 3020/24
