

DEPARTMENT OF PATHOLOGY
BASE HOSPITAL – KAMBURUPITIYA
HISTOPATHOLOGY REPORT

Name : Mrs. M. A. Kusumalatha
Age : 56 yrs
Sex : Female
Referred by : Dr Saman Edirimuni (VS)

Ref. No : KB/124/25
Hospital : BH Kamburupitiya
Ward/Clinic : 10
BHT/Clinic No: 2025/3396/372

Specimen:

Tru cut biopsy of left breast lump

Macroscopy:

Six cores ranging from 07 to 12 mm in maximum length.

Microscopy:

Sections show cores of breast tissue with infiltrating tumour composed of nests and trabeculae surrounded by a desmoplastic stroma. Tubule formation is <10%. The cells show abundant tumour necrosis with high nuclear pleomorphism. Mitoses were 4 per 2mm². The cyto-architectural features place the tumour in Nottingham grade II. No definite DCIS is seen. Lymphovascular invasion is not present.

Conclusion: Tru cut biopsy of left breast lump:

Tumour type: Invasive carcinoma, NST (B5b)

Tumour grade: Provisional Nottingham grade II

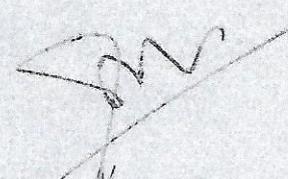

DCIS: Not seen

Lymphovascular invasion: Absent

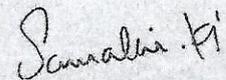

Comment: Receptor status (ER/PR/Her 2/Ki 67) will be assessed with immunohistochemistry and an addendum report will be issued.

Reported date - 11.02.2025
